

PURE HOLD HYGIENE HANDLE

Opening the door to a cleaner world

Developed in conjunction with NHS Infection Prevention Specialists, the innovative new Pure Hold Hygiene Handle offers an effective solution to the problem of widespread non-compliance with hand hygiene standards.

The Pure Hold Hygiene Handle has been trialled successfully in NHS hospitals and was shown to significantly increase hand hygiene compliance; in some cases by over 700%*. The handle dispenses Virucidal Gel proven to kill the most common bacteria and viruses. It is easy to install, maintain and approved for use on Fire Doors.

The result is higher standards, a reduction in cross-contamination and increased awareness of the importance of good hand hygiene. Research shows that dirty hands can routinely contaminate door handles and vice versa. The Pure Hold Hygiene Handle helps to solve this issue.

The Pure Hold Hygiene Handle is more effective than any other system or product on the market because it is the only one that ensures participation by everyone.

Our Pure Hold Hygiene handle has the following benefits:

- 98.5% cleaner than standard door handles
- Independently proven effective against bacteria and viruses (incl. EN1500)
- Suitable for use in medical, food and industrial environments
- Leaves hands feeling clean and refreshed, with no sticky residue
- pH of 5.5 to complement the natural pH of skin
- Dermatologically tested

*independently trialled/tested

“

The Pure Hold Hygiene Handle is a truly exciting development in the field of infection prevention. The original concept, thoughtful design and simple accessibility and ease of use will provide an extremely useful tool for improving hand-hygiene compliance in any institution. ”

Matt Richardson,
Head of Infection Prevention at
Queen Alexandra Hospital Portsmouth

“

We have had really positive feedback on the Hygiene Handle from hospital staff and visitors. I would like to see them installed on the entrance to every ward. ”

Karen Davis-Blues,
Infection Prevention Nurse at RHCH
Winchester
